

LOW PHOSPHORUS LAMB BLEND

**My
Perfect
Pet™**

Low Phosphorus Lamb Blend for adult dogs is formulated to be lower in Phosphorus than recommended in the AAFCO Nutrient Profiles For Dogs. Low Phosphorus Lamb Blend is recommended by veterinarians to lower the Phosphorus levels in dogs with compromised. Just because the diet needs to be lower in Phosphorus doesn't mean it has to be lower in flavor – dogs naturally love the taste of freshly baked lamb

blended with fresh whole foods. Because we use only boneless muscle meat that is naturally low in Phosphorus, the Protein can remain at levels recommended for fueling energy and maintaining muscle mass. Because it does not meet the AAFCO standard for Phosphorus, it is labeled for intermittent feeding only unless recommended by a veterinarian.

KEY BENEFITS

- Lower in Phosphorus to promote healthy kidney function.
- Targeted levels of protein and fat to fuel energy and muscle mass.
- Low in carbohydrates to help maintain optimal weight.
